SUMMARY

Full-Stack Developer focused on building SaaS and management systems to digitize business processes. Hands-on experience developing applications with Next.js, TypeScript, and MongoDB, including authentication, interactive dashboards, E2E testing, and third-party service integration. I am looking to join a team where I can continue growing while contributing technical criteria, clean code, and a strong product-driven mindset.

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Freelance) | *CostaSpanish Academy* May 2025 – Present

- **SaaS for Educational Management:** Design and development of a centralized system to automate academy operations, replacing manual processes with a digital ecosystem.
- **Business Logic & Credit System:** Implementation of a core engine for class vouchers, featuring real-time credit tracking, expiration validation, and payment status monitoring.
- **API Integrations:** Seamless integration with Google Calendar and WhatsApp API to automate scheduling and class reminders.
- **Data Modeling:** Structuring NoSQL (MongoDB) databases using complex Mongoose schemas to manage student profiles, active plans, and pedagogical history.
- **Quality & DevOps:** Deployment of CI/CD pipelines on Vercel with staging environments and E2E testing using Playwright to protect critical production flows

Web Developer (Intern) | *Sección9* Oct 2024 – Jan 2025 | Barcelona, Spain

- **Custom Solutions:** Developed tailored themes and plugins in WordPress and optimized web architectures based on **Laravel (PHP)**.
- **Agile Lifecycle:** Managed workflows and technical ticket prioritization under Scrum methodology, using Trello to ensure production deadlines were met.
- **UX & Performance Optimization:** Implemented high-fidelity designs from Figma, reducing load times and enhancing end-user interactivity.

EDUCATION

- **B.S. in Computer Engineering** | *Universidad Alfonso X el Sabio*
Currently finishing 2nd Year. 100% online modality, **fully compatible with full-time work.**
- **Associate Degree in Web Application Development (DAW)** | *Universidad Alfonso X el Sabio*
Sept 2022 – June 2024 | Madrid, Spain

TECHNICAL SKILLS

- **Backend:** Node.js, Express, PHP (WordPress/Laravel).
- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind, Zustand / Redux Toolkit.
- **Databases:** MongoDB, MySQL.
- **Testing:** Jest, React Testing Library (basic).
- **Tools & Deployment:** Git, GitHub Actions (CI/CD), Docker (basic), Vercel, Postman, Jira, Scrum.
