SUMMARY

Full Stack Developer with a core stack in React · TypeScript · Next.js · Node.js · MongoDB. Experience building an end-to-end SaaS in production: authentication, data modeling, external API integration and CI/CD pipeline. Currently studying a Computer Science degree in a format fully compatible with full-time work.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Freelance) · CostaSpanish Academy · January 2026 – Present · [Repository](#)

Stack: Next.js · TypeScript · Node.js · MongoDB · NextAuth.js · Google Calendar API · GitHub Actions · Vercel

- End-to-end development of a management SaaS for a language academy (authentication, students, bookings, credits and admin panel), deployed in production with a real client.
- Authentication with NextAuth.js (OAuth + credentials), session management and role-based access control (admin / student).
- MongoDB/Mongoose schema modeling differentiating embedded relationships (class history) from normalized references (active plans) based on access patterns and write frequency.
- Credits and bonus module: expiry logic, payment states and real-time updates; metrics dashboard (active students, consumed credits, revenue) built on MongoDB aggregations.
- Google Calendar API integration for bidirectional booking sync from the admin panel.
- CI/CD pipeline with GitHub Actions for automated PR validation and continuous deployment on Vercel, with architecture documented in a technical README.

Web Developer · Sección9 (Intern) · October 2024 - January 2025 · Barcelona, Spain.

Stack: WordPress · PHP · Laravel · Figma · Jira

- Development of custom WordPress themes and plugins in PHP, adapting business logic to each client.
- Contribution to Laravel projects: feature development, bug fixing and code review in a Scrum environment managed with Jira.
- UI implementation from Figma designs ensuring visual fidelity and cross-browser compatibility.
